Designed to work for you
DESIGNED TO WORK FOR YOU

Hunter Douglas is fluent in design. Working with architects and contractors, we translate aesthetic specifications into construction requirements, creating solutions that express the vision of each project. For over 60 years, this collaborative approach has contributed to thousands of buildings around the world.

We define success by our ability to meet unique challenges, define new products and applications, and find ways to do more with less. From pre-engineered standards to innovative custom systems, the Hunter Douglas Architectural team helps you create versatile, sustainable and durable ceiling and wall solutions.

Project: Canarias Airport, Las Palmas de Gran Canaria, Spain
Architect: Estudio LAMELA
Product: Linear 30B and 80B/180B
HUNTER DOUGLAS, A WORLD OF INNOVATION

Business is people. At Hunter Douglas, we pride ourselves in our employees - a network of experienced, intelligent, passionate and creative men and women from over 100 countries who work together in a spirit of collaboration. Along with proven manufacturing processes and material usage, that is what keeps Hunter Douglas at the forefront of innovation and design.
OUR FOUNDING

Hunter Douglas was built on recycled aluminum. In 1940, company founder Henry Sonnenberg moved to America from Holland and founded the Douglas Machinery Corporation. A few years later, he began a critical collaboration with inventor Joe Hunter, who had invented a casting machine that could convert scrap aluminum into ultra-hard alloys.

CEILING DEVELOPMENT

Based on this unique casting machine and developments of roll-forming and stamping equipment, Henry and Joe pioneered the development of the aluminum venetian blind, and jointly created Hunter Douglas as we know it today. In 1962, Hunter Douglas introduced linear metal ceilings, creating a standard system that today has evolved into a complete range of products for projects of all types.

WORLDWIDE PRESENCE

Today, a significant part of Hunter Douglas’ business remains dedicated to recycled aluminum, with a recycling facility, smelter, and continuous caster in Rotterdam, Holland. From that base, the company operates fabrication and distribution facilities in over 100 countries, with installations in thousands of projects around the world.

SUSTAINABILITY

Hunter Douglas stands at the forefront of developing sustainable product concepts. We seek to simplify assembly, improve production processes, eliminate waste and reduce maintenance within our own operations, while also partnering with organizations such as C2C Products Innovation Institute, to make an impact on all phases of the building industry.

HEARTFELT® CEILINGS

Based on our deep knowledge of ceilings and their applications, combined with expertise in textiles and production techniques we have developed new ceiling design possibilities with HeartFelt®. This new ceiling material provides outstanding acoustic performance and an aesthetic appearance which results in a warm ambiance rarely experienced before.
Project: Admix, Rotterdam, The Netherlands
Architect: Hunter Douglas Architectural
Product: HeartFelt® Linear Ceiling
HEARTFELT® CEILINGS

Kookstudio 't Havenmantsje, Harlingen, Nederland
Product: HeartFelt® Linear Plafond
Architect: Hunter Douglas Architectural
HeartFelt® is an innovative, patented felt product that turns every ceiling into a visual and acoustic playground.

**KEY FEATURES**

- Modular ceiling system with felt panels
- Panel dimensions 40 x 55 mm, 40 x 80 mm and 40 x 105 mm
- Panel length 1000 to 6000 mm
- Six standard carrier modules to vary reveal (M50-M100) for acoustics and aesthetics, larger modules up to M200 on request
- Easy plenum access
- Interior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

---

The Solid Wood Linear panels offer a real wood, acoustic solution for any project.

**Project:** Student Pavilion Erasmus University, Rotterdam, The Netherlands - Product: Solid Wood Linear, American Red Oak
Architect: Powerhouse Company & de Zwarte Hond;

**KEY FEATURES**
- Interior applications
- Panel width: 63 – 68 – 70 – 82.6 – 92 – 110 - 116 mm
- Lengths up to 2500 mm
- Panel thickness: 15 mm
- Joint width: 12 - 13 - 15 - 19 mm
- Multi-panel layouts possible, combining different widths
- Other sizes are available upon request
- Variety of 20+ wood species, FSC or PEFC certified
- Clear and coloured stains available
- Also available as wall solution (see page 300) or exterior application (see page 252)
- Curved and undulating shapes possible
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
**TYPICAL ISOMETRICS**

Project: City Hall, Didam, The Netherlands - Product: Veneered Wood Grill, Ash - Architect: De Twee Snoeken
The demountable veneered wood tiles and panels are easily installed in a T-grid and provide an acoustic solution for any space.

**Project:** Smart Campus, Heerlen, Netherlands - **Product:** Veneered Wood Panels - **Architect:** Van Eijk and van der Lubbe

**KEY FEATURES**
- Interior applications
- Tile sizes: 300/600/900/1200 x max. 1200 mm, other sizes available upon request
- Installed in T24 grid, with exposed/semi-concealed/concealed detail
- Types: Classic / Classic Plus / Modern / Prestige / System
- Various perforation patterns for acoustical performance
- Other sizes are available upon request
- Nano perforation for high acoustics up to $\alpha_{w} 0.95$
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Clear and coloured stains available
- Demountable system for easy access to plenum
- Also available as wall solution (see page 308) or exterior application (see page 260)
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services

WOOD SOLUTIONS

VENEERED WOOD

COLOURS AND FINISHES

Hunter Douglas offers a wide choice of wood species and finishes. Coloured stains can be applied to match custom colours or existing building elements. See our website for the most up to date information. The images are for illustration purposes only.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer types shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during his lifetime, making each veneer unique.

Organic dyed veneer is a completely natural veneer, dyed to create a unique, uniform colour.

ENGINEERED VENEERS

Engineered veneer is a natural material, processed to create a specific predesigned appearance. The veneer patterns create a more consistent and uniform appearance.

SPECIALS

A high variety of special veneers and top layers are available.

Banana trunk veneers

Engineered special veneers

- Other finishes such as HPL, melamine or handsprayed RAL colours are available upon request.
Please refer to our website for the latest product range.
Project: Orbis Medical Centre, Sittard, The Netherlands - Product: Veneered Wood Tiles - Architect: Bonnema Architecten
Topline® is the ideal solution to accommodate the acoustic requirements in three different ways: sound absorption, deflection or diffusion.

**KEY FEATURES**

- Interior applications
- Panel sizes: 128/262 x 2050/2780 mm
- Installed in T24 grid, with tongue and groove connection
- Types: TTA / TLS / TVB / TLD / TLQ
- Various perforation designs
- Acoustic solution for sound absorption / deflection / diffusion
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Clear and coloured stains available
- Demountable system for easy access to plenum
- Also available as wall solution, see page 304
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services

Create a wooden look and a natural ambience with the Metal Woodprints.

**KEY FEATURES**

- Interior applications
- Realistic wood designs available for our metal ceilings range
- Use the benefits of metal, with the looks of natural wood
- Direct print or transfer prints solutions

- Acoustic solutions available
- Also available for exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
**WOODPRINT APPLICATIONS**

Woodprint finishes are available as standard for the following HunterDouglas® Metal Ceilings:

- **Planks (see page 56 - 103)**
- **Tiles (see page 104 - 111)**
- **Baffles (see page 172 - 191)**
- **Cell (see page 192 - 207)**
- **Linear (see page 208 - 227)**
- **Curved (see page 228 - 239)**
COLOURS AND FINISHES
Hunter Douglas offers a wide choice of colours, wood prints and finishes, with different printing techniques. See our website for the most up to date information. The images are for illustration purposes only.

Alpha parallel and Alpha cross are specifically conceived and designed to deliver infinite possibilities in terms of style and combinations.

**KEY FEATURES**

- Panel sizes:
  - minimum 300 x 520 mm
  - maximum 1050 x 2400 mm*

- Square-edge design in parallel or cross design installation

- Perforated panels with non-woven tissue for acoustic control

- On site waste reduction with factory fabricated dimensional material

- Downweight: reduce static load with lightweight aluminum or steel

- Easy plenum access

- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

*For large dimensions contact our sales unit

Project: Poortvrije Passages Amsterdam, The Netherlands; Hook-On panels - Architect: Benthem Crouwel Architects / Powerhouse Company / Merk X
Beta Hook-On Continuous metal ceiling systems for large monolithic surface designs.

**Project:** Headquarter European Grid Manager, Arnhem, The Netherlands - **Product:** Planks Beta B (Hook-On Continuous) - **Architect:** Studio Groen + Schild

**KEY FEATURES**

- Panel sizes:
  - minimum 300 x 520 mm
  - maximum 1050 x 2400 mm*
- Square-edge design
- Perforated panels with non-woven tissue for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum or steel
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

*For large dimensions contact our sales unit*
TYPICAL ISOMETRICS

1 = Hook-On plank
2 = Hook-On profile
3 = Primary profile
4 = Suspension
5 = Hook-On profile splice
6 = Primary profile splice

Maximum spans primary and secondary grid 1200 mm
Maximum cantilevers 300 mm

TYPICAL SECTIONS

PERFORATION PATTERNS

Standard patterns shown. See page 350 for all perforation patterns.
Scale shown: 1:1, unless otherwise noted.

PHYSICAL DATA

Substrate: Steel or Aluminium
Fire rating: Class A1 according EN 13501-1
Weight: Varies 4.9 - 7.8 kg/m²
Light reflectance (LR) Coefficient:
- Varies with finish
- RAL9010: LR = 0.81
Acoustic ratings: $\alpha_w$ 0.55-0.90: See page 352

Delta Torsion-Spring Segmented ceiling system is a popular alternative to curved panels, segmenting allows the use of downward accessible flat panels in a curved ceiling.

**KEY FEATURES**

- Panel sizes:
  - minimum 300 x 520 mm
  - maximum 1050 x 2400 mm
- Torsion-Spring feature allows point-access and 100% access to plenum
- Square-edge design
- Perforated panels with non-woven tissue for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum or steel
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
### TYPICAL ISOMETRICS

Project: Train station Bijlmer, Amsterdam, The Netherlands - Product: Planks Delta S (Segmented) - Architect: Nicholas Grimshaw and Arcadis
Lay-In/Lay-On tiles in standard sizes, with square, flush or reveal edge details for standard grid options.

**Project: Atlas Arena- Sport and Entertainment hall, Lodz, Poland - Product: Tiles (Lay-In/Lay-On) - Architect: ATJ**

**KEY FEATURES**

- Standard dimension 600 x 600 mm
- Edge options: square, flush, reveal
- Perforated panels with non-woven tissue for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum or steel
- Easy installation - no fasteners or tools required
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

CUSTOM COLOURS
Project: Raffles Hotel, Dubai, United Arab Emirates - Product: Stretch Metal Gamma (Lay-On) - Architect: Arif & Bin Toak
HunterDouglas® XL50 ceiling panels are based on composite technology that originate from the aircraft industry. This state of the art technology results in lightweight and extremely flat ceiling panels.

**QUADROCLAD® ACOUSTIC**

QuadroClad® Acoustic Panels are based on composite technology that originates from the aircraft industry. The lightweight (micro) perforated skins are fused to a honeycomb aluminium core, that has been designed to meet the architect’s demand for high quality, extremely flat and extra-large sized ceiling systems. The QuadroClad® Acoustic panel method of construction allows the designer to virtually ignore the span of the material and provides them with an enormous amount of freedom when creating their designs.

**XL50**

QuadroClad® XL50, our BASIC panel, is a high quality panel that delivers strong acoustic performance along with design flexibility and durability. Custom shapes, curves, clouds, baffles, planks and tapered panels, a variety of joint options and an extensive range of colours give you unparalleled creative freedom.

**KEY FEATURES**

- Superior flatness
- Easy installation
- Big panel size
- High panel quality
- Smooth appearance
- Fire retardant
- Curved solutions

Project: Lario Centre - Bennet, Tavernola, Italy - Product: QuadroClad® Acoustic panels XL50 - Architect: Progetto CMR
**TYPICAL ISOMETRICS**

Buildings are defined by form and design. Often they are the product of an architects inspirational vision. At Hunter Douglas our mission is to help designers realise that vision, by providing them with a palette of colours, materials and surface finishes that will inspire their creativity. Colours are available in different gloss units as well as high gloss and matt finishes.
Project: Lario Centre - Bennet, Tavernela, Italy - Product: QuadroClad® Acoustic panels XL50 - Architect: Progetto CMR
HunterDouglas® XL100 ceiling panels are based on composite technology that originate from the aircraft industry. This state of the art technology results in lightweight and extremely flat ceiling panels.

Project: Visualisation Public Space - Product: QuadroClad® Acoustic panels XL100

**QUADROCLAD® ACOUSTIC**

QuadroClad® Acoustic Panels are based on composite technology that originates from the aircraft industry. The lightweight (micro) perforated skins are fused to a honeycomb aluminium core, that has been designed to meet the architect’s demand for high quality, extremely flat and extra-large sized ceiling systems. The QuadroClad® Acoustic panel method of construction allows designers to virtually ignore the span of the material and provides them with an enormous amount of freedom when creating their designs.

**XL100**

QuadroClad® XL100 is our EASY panel, its roll formed edge on two sides guarantees an easy installation when using the fixing clamps supplied. The clamp cover provides an optical 25 mm closed joint, which can be coloured to create an even more striking visual effect. The XL100 is perfectly suitable for large ceiling projects, where same sizes are desirable.

**KEY FEATURES**

- Superior flatness
- Easy installation
- Big panel size
- High panel quality
- Smooth appearance
- Fire retardant
- Curved solutions
- Closed (contrasting) joints possible

Project: Doha Convention Centre, Doha, Qatar - Product: QuadroClad® Acoustic panels XL100 - Architect: Murphy/Jahn Architects LLC
QUADROCLAD® ACOUSTIC

QuadroClad® Acoustic Panels are based on composite technology that originates from the aircraft industry. The lightweight (micro) perforated skins are fused to a honeycomb aluminium core, that has been designed to meet the architect’s demand for high quality, extremely flat and extra-large sized ceiling systems. The QuadroClad® Acoustic panel method of construction allows designers to virtually ignore the span of the material and provides them with an enormous amount of freedom when creating their designs.

XLts

Our QuadroClad® Torsion-Spring metal ceiling delivers style and ease with its versatile carrier/grid system. Both flat and curved panels swing down ensuring safe access to the plenum. The XLts is a ceiling solution with reliable, easy to install substructure. Each ceiling panel can be swung down along the suspension profile in either direction for maintenance work. Large-size concealed panels offer a monolithic visual with 100% downward accessibility.

KEY FEATURES

- Superior flatness
- Easy installation
- Big panel size
- High panel quality

HunterDouglas® XLnt ceiling panels are based on composite technology that originate from the aircraft industry. This state of the art technology results in lightweight and extremely flat ceiling panels.

**QUADROCLAD® ACOUSTIC**

QuadroClad® Acoustic Panels are based on composite technology that originates from the aircraft industry. The lightweight (micro) perforated skins are fused to a honeycomb aluminium core, that has been designed to meet the architect’s demand for high quality, extremely flat and extra-large sized ceiling systems. The QuadroClad® Acoustic panel method of construction allows designers to virtually ignore the span of the material and provides them with an enormous amount of freedom when creating their designs.

**XLnt**
QuadroClad® XLnt is our COMPLETE system and as its name suggests is our most comprehensive ceiling solution. It is a fully engineered panel with aluminum extrusion frames on two sides. The ceiling has a narrow 12.5 mm wide joint around each panel. Each individual panel can be opened/demounted with a swing-down/swing-up motion for easy access to the services and installations within the plenum.

**KEY FEATURES**

- Superior flatness
- Easy installation
- Big panel size
- High panel quality
- Smooth appearance
- Fire retardant
- Curved solutions
- Narrow joints
TYPICAL ISO METRICS

Project: Bicycle Parking Jaarbeursplein, Utrecht, The Netherlands - Product: QuadroClad® Acoustic panels XLnt (Swing-Down)
Architect: Kraaijvanger Architects
300C/300L metal ceiling panels offer a subtle, long span design for interior ceilings with V- or square joint detail.

**KEY FEATURES**

- Panel width: 300 mm
- Panel length: 1000 - 6000 mm
- Bevel-edge design and square edge design
- Perforated version with non-woven for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum or steel
- Easy plenum access
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

METAL CEILINGS

300C/300L C-GRID

Project: Employee restaurant, Denmark - Product: Wide Panel 300C/300L (C-Grid)
With linear spaced objects in the ceiling, the Tavola™ Baffles series offers a lightweight metal baffle solution for interior commercial spaces.

Project: Darwin Centre, Shrewsbury, UK - Product: Baffles Tavola™ (Straight) - Architect: Chapman Taylor

**KEY FEATURES**

- Profile lengths up to 5000 mm
- Profile heights: 50 - 300 mm
- Profile widths: 20, 30, 40 and 50 mm
- Standard FE carrier 40 x 50 mm, black
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight steel or aluminum
- Standard from pre-painted steel strip
- Easy plenum access

### STAINLESS STEEL OPTIONS

Object shows reflectivity of finish

- Satin: 7772C
- Brushed: 7774C
- Bright: 7776C
- Mirror: 7778C
Project: Law firm Wragge Lawrence Graham & Co, Birmingham, United Kingdom - Product: Baffles Tavola™ (Straight) - Architect: Project architects Weedon
Create relief and rhythm within the ceiling by varying the depth and space between the baffles.

**Project: Tavola™ Levels Concept**

**KEY FEATURES**

- Profile lengths up to 5000 mm
- Profile heights: 50 - 300 mm
- Profile widths: 20, 30, 40 and 50 mm
- Standard FE carrier 40 x 50 mm, black
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight steel or aluminum
- Standard from pre-painted steel strip
- Easy plenum access
TYPICAL ISOMETRICS

Project: Ikea, Roncadelle, Italy - Product: Baffles Sedes™ (Straight)
The slender blades of V100/V200 offer one-way plenum masking in 100 or 200 mm depths at 100-210 mm wide spacing, customisable with deco profiles.

**KEY FEATURES**

- Panel length: 800 mm up to 6000 mm
- Panel heights: 100 mm (V100); 200 mm (V200)
- Sliding carriers can be used for repeated plenum access areas
- Also available in exterior application (V100 only)
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
- Option of deco profile clipped to the bottom of the V100/200 blade. In extruded aluminium or solid wood

CUSTOM COLOURS
Project: Gdansk University Chemistry Faculty, Gdansk - Product: Cell Tiles (Unigrid) - Architect: Warsztat architektury
The Linagrid Open Cell ceiling system creates a linear grid look and a clean plenum mask.

**KEY FEATURES**

- Tile dimensions 600 x 1200 mm
- Standard modules 50, 60, 75, 86, 100, 120, 150 and 200 mm
- Other dimensions and modules available on request
- One directional plenum mask
- Monolithic design with integrated support structure
- Downweight: reduce static load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

Project: Domoteka. Furniture shopping Mall, Marki, Poland - Product: Cell Linagrid - Architect: Archmo
TYPICAL ISOMETRICS
1 = Main runner 2400 mm
2 = Linagrid tile
3 = Cell hanger

CUSTOM COLOURS
METAL CEILINGS

Project: Domoteka. Furniture shopping Mall, Marki, Poland - Product: Cell Linagrid - Architect: Archmo
The MultiPanel metal ceiling system uses a universal carrier enabling an unlimited combination of panel depths and widths using B, BD and BXD panels with a width of 30, 80, 130 or 180 mm.

**KEY FEATURES**

- Panel widths: 30 mm, 80 mm, 130 mm and 180 mm, joint width 20 mm
- Panel length: 800 mm up to 6000 mm
- Panel depths:
  - 15 mm (30B, 80B, 130B, 180B)
  - 39 mm (30BD)
  - 64 mm (30BXD, 80BXD, 130BXD)
- Square edge design
- Perforated version with non-woven for acoustic control
- Curved carrier application available
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
TYPICAL ISOMETRICS

1 = 30B panel

METAL CEILINGS

MULTIPANEL

Project: Leaseplan Branch Office, Milano, Italy - Product: Linear MultiPanel - Architect: Studio PCMR
The 30BD/30BXD Linear metal ceiling system provides a bold linear design with optimal acoustics and heat exchange for CCA projects.

**Project:** DSM Ahead, Geleen, the Netherlands - **Product:** Linear 30BD/30BXD + CCA - **Architect:** Broekbakema, Rotterdam

**KEY FEATURES**

- Panel widths: 30 mm, joint width 20 mm (standard) or 30 mm (CCA)
- Panel length: 800 mm up to 6000 mm
- Panel depths: 39 mm (30BD) and 64 mm (30BXD)
- Carrier modules: 50 mm (standard) and 60 mm for enhanced heat exchange in CCA application
- Square edge design
- Perforated version with non-woven for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
TYPICAL ISOMETRICS

Project: Dubai Mall, Burj Dubai, United Arab Emirates - Product: Curved 84R - Architect: DP Architects PTE Ltd
Curved Carrier metal ceilings create shaped designs with straight panels.

Project: Fitness center World Class, Moscow region, Russia - Product: Curved Carrier

**KEY FEATURES**

- Panel width: 300 mm or 100 mm module
- Panel length: 800 - 6000 mm
- Segmented carrier: minimum radius convex 5 m, concave 2 m
- Flexible carrier: minimum radius convex 600 mm, concave 400 mm (depends on panel type)
- Ceilings in concave, convex or ondulating
- Perforated version with non-woven for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum
- Easy plenum access
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
METAL CEILINGS

Project: Wroclaw Airport, Wroclaw, Poland - Product: Curved Carrier - Architects: JSK
EXTERIOR CEILINGS

Offering a wide range of design possibilities, exterior ceilings have been developed with the same appearance as the range of HunterDouglas® interior ceilings.
Project: Ferrari Restaurant, Maranello, Italy
Architect: M. Visconti
Product: Linear Multipanel Exterior
Specially selected wood species can be used under external canopies.

Project: Pier-K, Nieuw-Vennep, The Netherlands; Solid Wood Linear Exterior, Western Red Cedar; Architect: Ector Hoogstad Architecten

**KEY FEATURES**

- Exterior applications
- Various Grill dimensions:
  - Width: 20 mm
  - Lengths up to 2500 mm
  - Height: 35 - 120 mm
  - Joint width: 25 - 150 mm
- Various Linear dimensions:
  - Width: 63 - 68 - 70 - 83 - 92 - 110 - 116 mm
  - Lengths up to 2500 mm
  - Thickness: 15 mm
  - Joint width: 12 - 13 - 15 - 19 mm
- Wood can be FSC or PEFC certified
- Clear and coloured stains available
- Curved and undulating shapes possible
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
**TYPICAL ISOMETRICS**

COLOURS AND FINISHES

Hunter Douglas offers a wide choice of colours, wood species and finishes. Coloured stains can be added to match custom colours. See website for the most up to date information. The wood images are for illustration purposes only.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer type shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during its lifetime, making each veneer unique.

American Maple  American Red Oak  American Walnut  American/European Ash  European Birch  Pine  Steamed Beech

ORGANIC DYED VENEERS

Organic dyed veneer is a completely natural veneer, dyed to create a unique, uniform colour.

Ash BF 001  Ash BF 002  Ash BF 049  Birch BG 046  Birsd Eye Maple E 069  Bolivar EB 064  Walnut EA193

ENGINEERED VENEERS

Engineered veneer is a natural material, processed to create a specific predesigned appearance. The veneer patterns create a more consistent and uniform appearance.

Oak  Wenge  Birch  Rosewood  Teak  Walnut  Cherry  Zingana

SPECIALS

A high variety of special veneers and top layers are available.

Banana trunk veneers

Grenada  Porto Rico  Martinique  St Barth  Aruba  Barbados  Anguilla  Dominica

Engineered special veneers

Arrow  Brown Devil  Deco M02  Deco M06  Burl  Cherry EVH  Vega  Mark

• Other finishes such as HPL, melamine or handsprayed RAL colours are available upon request. Please refer to our website for the latest product range.
Veneered Wood can be used to create canopies for a stunning first impression.

KEY FEATURES

- Exterior applications
- Tile sizes: 300/600 x max. 1200 mm, other sizes available upon request
- Installed in a corrosion resistant T24 grid, with a semi-concealed detail
- The System ceiling type uses springs to keep the panel in place
- Variety of 20+ wood species, FSC or PEFC certified
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Clear and coloured stains available
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security service

PROTECTED BY LUXACOTE®

Luxacote® is a unique treatment for Luxalon® Exterior Ceilings.

Unprecedented Protection

Proprietary Hunter Douglas’ Luxacote® makes exterior ceilings extremely durable, providing colour and gloss stability, high scratch resistance, and resistance to corrosion. With Luxacote®, there is no need to recoat, which reduces maintenance costs and additional environmental impact.

Luxacote® protects the aluminium surface from corrosion and permanently anchors the paint to the metal surface. It contains highly colour-stable pigments for optimal colour-fastness and a highly scratch- and wear-resistant surface.

PROTECTED BY LUXACOTE®

Luxacote® is a unique treatment for Luxalon® Exterior Ceilings.

Unprecedented Protection

Proprietary Hunter Douglas’ Luxacote® makes exterior ceilings extremely durable, providing colour and gloss stability, high scratch resistance, and resistance to corrosion. With Luxacote®, there is no need to recoat, which reduces maintenance costs and additional environmental impact.

Luxacote® protects the aluminium surface from corrosion and permanently anchors the paint to the metal surface. It contains highly colour-stable pigments for optimal colour-fastness and a highly scratch- and wear-resistant surface.

- Northwest Mountain Hemlock 8489
- Whitewash 8490
- Rustic Cherry 8939
- Cherry 8942
A cost- and timesaving system, that simplifies installation and provides safety and reliability, even when faced with strong wind loads.

**KEY FEATURES**

- Corrosion resistant construction for enhanced durability
- Applicable with all standard carriers
- Suspension heights 150 - 1250 mm
- Adjustable to allow for site tolerances
- Tested on loading capabilities

- Special edge trim construction for easy plenum access
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum

CUSTOM COLOURS
SPORTS CEILINGS

BETA SAFETY-LOOP

Project: Pepsi Arena Legia Football Stadium, Warsaw, Poland - Product: Stretch Metal Beta (Safety-Loop) - Architect: JSK
Impact resistance, acoustic performance, accessibility, compatibility, all combined in one versatile package: Gamma Sports Hall Ceiling.

**KEY FEATURES**
- Panel sizes 300 x 1800 mm
- Square-edge design
- Mesh panels with lay-on pads for acoustic control
- Tested on ball impact resistance
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminum or steel
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
TYPICAL ISOMETRICS

1 = Lay-On Plank
2 = Omega profile
3 = Locking bracket
4 = Profix suspension

Maximum spans primary grid 1200 mm
Maximum cantilevers 300 mm

TYPICAL SECTIONS

PHYSICAL DATA

Substrate: Steel or Aluminium
Fire rating: Class A1 according EN 13501-1
Weight: Varies ca 4.9 kg/m² - 7.8 kg/m²
Light reflectance (LR) Coefficient:
- Varies with finish
- RAL9010: LR = 0.81
Acoustic ratings: $\alpha_w 0.55-1.00$. See page 353
BIM
REVIT files available, see website for details.

BIM CAPABLE

Collaboration starts with Hunter Douglas.

Hunter Douglas Ceilings offer a comprehensive REVIT file library for BIM requirements, with resources that support the entire project, from design development, to working drawings, to preconstruction and construction, all the way through to ongoing operations and maintenance.
Perforation patterns improve acoustical performance as well as create aesthetic effects. Non-perforated option available for all products. Contact Hunter Douglas Ceilings for wood finish perforation options. Scale 1:1 shown, unless otherwise noted.

ACOUSTIC TEST RESULTS

SOUND ABSORPTION ($\alpha_w$) SUMMARY

Ceiling panels are available in a variety of perforation patterns for optimum acoustical performance. Sound absorption can be achieved by the addition of backing these panels with acoustical fabric or pad.

Hunter Douglas Ceilings utilizes metal, wood and felt materials to design, engineer and manufacture ceiling systems that optimise interior environmental quality, material resources and energy usage. Hunter Douglas incorporates sustainable materials and employs sustainable practices in its manufacturing processes. When applied as part of an overall building plan for new and renovation construction, solutions from Hunter Douglas may contribute to Green Globes and LEED BD+C and ID+C certification for schools, retail, hospitality, healthcare and commercial interiors.

**SUSTAINABILITY**

**RESOURCES**

**ACOUSTIC COMFORT**
Noise of equipment and conversation have been shown to impact worker comfort and productivity. Hunter Douglas acoustical ceilings have noise reduction coefficients \( \alpha_w \) up to 1.00.

**DAYLIGHTING**
Hunter Douglas ceilings diffuse light for visual comfort and move daylight into a space, reducing energy used by artificial lights.

**ENERGY PERFORMANCE**
Interior spaces designed with light colours and a minimum of 70% reflectance on the ceilings and walls can reduce artificial lighting requirements significantly, reducing energy consumption.

**BUILDING PRODUCT DISCLOSURE**
Hunter Douglas Ceilings uses products and materials for which life-cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts.

**RECYCLED CONTENT**
Using both pre-consumer and post-consumer materials, many Hunter Douglas systems feature recycled components in steel, aluminum, and HDPE plastics.

**INDOOR AIR QUALITY**
Perfect for projects where air quality is a priority, nearly all Hunter Douglas products meet low emissions standards for GREENGUARD and GREENGUARD Gold certification.
LEED
LEED is transforming the way we think about how building spaces are designed, constructed, maintained and operated. Hunter Douglas’ continued research and development to create ceilings products that are more environmentally friendly contribute to the overall performance of a building, as well as to LEED certification by optimising daylighting and improving acoustical comfort and energy efficiency.

ENVIRONMENTAL PRODUCT DECLARATION (EPD)
Hunter Douglas understands the importance of transparency to sustainable design and building. From raw material extraction through final disposal or reuse, we can provide life-cycle assessments on many of our products environment and health impacts.

ECOSCORECARD
Our ecoScorecard LEED calculator helps customers search and evaluate the impact of Hunter Douglas’ ceilings products against leading environmental rating systems. Using the most up-to-date data in the marketplace, ecoScorecard provides clear, concise product information as well as supporting documentation.

GREENGUARD
Hunter Douglas is committed to meeting the growing demand for healthier, more sustainable products. Meeting the rigorous and comprehensive standards for low emissions of VOC’s, our Greenguard Gold Certified ceilings contribute to the overall indoor air quality and general health of a building space.

FSC® CERTIFIED (FOREST STEWARDSHIP COUNCIL)
Hunter Douglas is committed to protecting our forests for future generations. Many of our wooden ceilings are FSC certified, which employ forest friendly resource management and help to reduce environmental impact by promoting responsible consumption. Hunter Douglas’ FSC Chain of Custody Certificate # is NC-COC-016324.

CRADLE TO CRADLE
Hunter Douglas adopts the cradle to cradle (C2C) product philosophy to the design of products that fit the circular paradigm. Both our metal and felt ceilings are Cradle to Cradle™ Bronze certified. They are designed for longevity, using materially healthy technical nutrients that can be reused at end of life as a high-quality source for something new.

OEKO-TEX® STANDARD 100
Hunter Douglas is committed to products that are safe to use and do not contain harmful chemicals or have a detrimental effect on health. Products that are certified according the OEKO-TEX® Standard 100 contribute to high and effective product safety from a consumer’s point of view.
For more than 50 years, we’ve been fortunate enough to help turn countless innovative sketches into innovative buildings. Architects, designers, investors and contractors from around the world have taken advantage of Hunter Douglas’ unmatched product development, service and support. Chances are, you’ve seen more of Hunter Douglas than you think.

Major operation centres in Europe, North America, Latin America, Asia and Australia, we’ve contributed to thousands of high-profile projects, from retail and commercial facilities to major transit centres and government buildings.

Not only are the world’s architects and designers our partners, they’re our inspiration. They continue to raise the bar for excellence. We create products that help bring their visions to life: Ceilings, Sun Louvres and Façades.

Designed to work for you
HISTORY HUNTER DOUGLAS

1919 - Henry Sonnenberg founds his machine tool distribution, later manufacturing, company in Düsseldorf, Germany

1933 - Henry uses 150 railroad cars to move his entire operation to Rotterdam, The Netherlands.

1942 - Henry moves to the US and founds Douglas Machinery Corporation.

1946 - Joe Hunter joins forces with Henry and develops new technology and equipment for the continuous casting and fabrication of lightweight aluminium, leading to the production of Venetian Blinds.

1960 - Hunter Douglas expands into Europe, Australia and Latin America.

1969 - Hunter Douglas stocks are first listed on the Montreal and Amsterdam Stock Exchanges.

2007 - Two new companies join the Hunter Douglas Group - 3Form and NBK Architectural Terracotta. High design, high performance sustainable building solutions, extending Hunter Douglas’ commitment to architectural products that are good for people and the planet.

2015 - XLnt, a super flat swing down acoustic ceiling is launched.

2016 - Hunter Douglas launches HeartFelt®, the first modular Felt Ceiling system ever.

ARCHITECTURAL SERVICES

We support our business partners with a wide range of technical consulting and support services for architects, developers and installers. We assist architects and developers with recommendations regarding materials, shapes and dimensions, colours and finishes. We also help with the creation of design proposals, visualisations, and installation drawings. Our services to installers range from providing detailed installation drawings and instructions to training installers and advising on the building site.
